Dear Dave

I just returned from my latest trip to China and while on the return flight I was thinking about what a great job you do. As you remember, before I moved my material handling products to your facility, almost one year ago, I had bedlam. My sales people were spending more time chasing orders, tracking wrong shipments, etc. Now we sell and meet with customers to grow our business. The turnaround in our business is not only in sales volume and the bottom line- but peace of mind knowing that we just email you the order and it is processed. Thank you and keep up the great work.

Martin Skulnik
President
